

Press Release April 2009

For Immediate Release

RTAS, Mac-VST and AU versions of the TT Dynamic Range Meter Plug-in are available now!

Thanks to the commitment of the German ProAudio companies BRAINWORX and SPL, the Pleasurize Music Foundation is now able to present the "All Platform Version" of the TT Dynamic Range Meter Plug-in! The same team which is responsible for the renowned BRAINWORX-bx-mastering tools and the SPL Analog Code® plug-in series was responsible for the transfer from VST/PC to all other platforms. The original VST/PC version was created in collaboration between Algorithmix and Tischmeyer Technology and is already used in hundreds of mastering studios worldwide. Covering all relevant platforms is an amazing contribution to the work of the Pleasurize Music Foundation. The free TT Dynamic Range Meter plug-in is available for download on this websites:

www.PleasurizeMusic.com , www.Algorithmix.com, www.Brainworx-Music.de and www.spl.info .

(Only the TT DR Offline Meter Tool which is used for the official DR Value measurement requires some extra time to be available also for Mac).

New Headquarter

Right after the Frankfurt Music Fair the Pleasurize Music Foundation has opened its new headquarter in Davenport, California. This is the new phone and fax contact: phone: +1 831 466 96 83 fax: +1 831 466 09 71

"We have chosen this area because of the strategically perfect connection to Silicon Valley, San Francisco and San Jose. Conversation and cooperation with the big brands of our branch is important for the successful work of the foundation. From here we have also good connections to L. A. and other important hot spots of the audio industry" PMF founder Friedemann Tischmeyer says.

Let's get the ball rolling all together for better sound and a healthy music industry!

Feel free to make donations to support our various further activities!
